OBJECTIVE

A Frontend & WordPress Developer with 1+ year of experience. Proficient in React.js, JavaScript, HTML5, CSS3, and WordPress (Elementor). Built 2 live web apps and real-world WordPress sites. Open to Frontend, WordPress, or Shopify Developer roles.

EXPERIENCE

ERP Operations & IT Support Analyst | Shiva Group of Companies · Ludhiana, Punjab

March 2025 – March 2026

- Worked with the IT team to test, debug, and validate modules of an in-house ERP system built on VB.NET and SQL Server
 - Wrote and executed SQL queries for payroll and inventory data reporting across multiple business units
 - Identified and documented ERP system issues, improving team response time on critical fixes
 - Collaborated with cross-functional teams to improve system usability and streamline operational workflows
 - Developed understanding of enterprise application architecture and business data flows — directly informing approach to building data-driven frontend UIs
-

PROJECTS

Printora | Wordpress · Elementor · Themes · Plugins | <https://printora.divyamanchanda.com/>

- Built single-page business website with Home, About, Services, Pricing & Contact pages
- Configured plugins for SEO, contact forms, and performance optimization
- Independently managed domain registration, DNS configuration, and hosting setup
- Ensured responsive design and cross-device compatibility

GameHub | React.js · Chakra UI · JavaScript · REST API | <https://game-hub-nine-tawny.vercel.app>

- Developed a responsive gaming discovery app fetching live data from the RAWG API — one of the largest gaming databases available
- Implemented genre and platform filtering using React state management (useState and useEffect hooks)
- Built reusable, modular components following clean code principles for maintainability
- Optimised UI for responsiveness and accessibility across mobile and desktop devices
- Deployed on Vercel for production-ready hosting

Hostified | HTML5 · CSS3 · Flexbox · CSS Grid | <https://hostifiedsite.netlify.app>

- Designed and developed a fully responsive static website using pure HTML5 and CSS3 — no frameworks
 - Implemented Flexbox and CSS Grid for adaptive layouts across mobile, tablet, and desktop screen sizes
 - Used semantic HTML5 throughout for accessibility and clean document structure
 - Optimised page structure and load performance for better user experience
 - Deployed on Netlify for live hosting
-
